

Security Product Training

IDsec offers a range of training courses that allow users to get the most out of security products. This includes a number of industry favourites as well as products supplied by us.

Many products are claimed to offer value “straight out of the box”, but we recognise that system managers, integrators and users often need some specific education in order to get the best out of a new deployment. We have therefore joined with Computerlinks to offer training courses in a range of popular products for both beginners and advanced users.

Courses normally take place in central London. Call us for more details, including prices and dates.

IDsec and
Computerlinks

IDsec has been providing network security products to a wide range of customers since 1997 and has always aimed to provide a full service, including training and support.

Computerlinks delivers award winning training, providing fully vendor certified courses at its prestigious London location, and backed by the Institute of IT Training. It was officially confirmed as the largest Check Point Authorised Training Centre in the World in 2007, and also has the largest network of Blue Coat Training providers in Europe.

Feel Good About Your Network

IDsec is an independent company specialising in network security. We can assess your security and advise on long-term protection: as we have for a range of blue-chip clients since 1997.
